PROFESSIONAL SUMMARY

Software Engineer with 1.5+ years of specialized experience in cross-platform mobile and web application development using Flutter, Firebase, and REST APIs. Proven track record of delivering performance improvements (50% speed increase on production apps) and building scalable solutions for international clients. Strong expertise in UI/UX implementation, backend integration, and agile development methodologies.

TECHNICAL SKILLS

~~Languages: Dart, Javascript, Typescript, HTML5, CSS3.~~

Frontend & Frameworks: Flutter, React(Basics), Express js, Getx, Provider.

Backend & Cloud: Node.js, Firebase (Firestore, Authentication, Cloud Functions), Realtime Database.

Tools & Technologies: Git, GitHub, REST APIs, Payment Gateway Integration, Google Maps API.

Methodologies: Responsive UI/UX Design, Cross-Platform Architecture, Agile/Scrum, Data Structures & Algorithms (DSA), System Design Fundamentals.

PROFESSIONAL EXPERIENCE

Software Engineer | Ns Ventures

Mohali, Punjab | Dec 2024 – Nov 2025

- Architected and delivered cross-platform Flutter applications serving international clients (Sweden-based stakeholders), managing end-to-end development from requirements gathering to production deployment
- Led complete Flutter UI/UX implementation for Marketing Planner project adopted by Sweden-based fitness franchise, building reusable component architecture that reduced development time by approximately 30%
- Built and deployed production-ready admin panels and CRM systems with integrated REST APIs, Firebase services, and payment gateway features across Android, iOS, and Web platforms
- Collaborated in agile environment with Sweden-based project managers, backend developers, and cross-functional teams to deliver maintainable software solutions meeting international stakeholder requirements

Software Engineer - Intern | Excellence Technology

Mohali, Punjab | June 2024 – Dec 2024

- Developed comprehensive expense tracker application with real-time budget tracking and local state management, implementing robust data persistence and validation logic
- Engineered responsive UI components and enhanced application usability across multiple Flutter projects, reducing bug reports by approximately 40% through rigorous testing protocols and code review practices
- Integrated REST APIs and optimized application performance through systematic debugging, code refactoring, and efficient caching strategies, achieving approximately 25% improvement in load times
- Mentored by senior developers on feature implementation, testing methodologies, and production maintenance best practices for enterprise-grade applications

KEY PROJECTS

Velora E-commerce App

[GitHub: Velora](#)

- Engineered cross-platform e-commerce application with secure Firebase authentication, complete shopping cart functionality, and responsive UI/UX design optimized for mobile and tablet experiences

- Implemented real-time inventory management and order processing system with Firebase Firestore, enabling seamless product browsing and secure checkout workflows

Dazz Drones - Web and App

[Live link: DazzDrones](#)

- Led production-grade Flutter development for drone booking platform and CRM workflows, serving customers across Android, iOS, and Web platforms
- **Optimized application performance achieving 50% improvement in loading speed and UI smoothness through code refactoring, lazy loading implementation, and efficient state management**
- Built comprehensive admin panel with real-time booking management, user analytics, and payment processing integration

Marketing Planner

- Spearheaded MVP UI/UX development for marketing platform adopted by Sweden-based fitness franchise, implementing complete Flutter widget architecture for rapid prototyping and real-world product testing
- Delivered pixel-perfect implementation of design specifications with custom animations and responsive layouts, enabling efficient stakeholder feedback and iterative refinement cycles

Portfolio Website

[Live link: Portfolio](#)

- Developed and deployed responsive portfolio website using Flutter Web and Firebase Hosting, showcasing technical projects with interactive UI elements and optimized performance

EDUCATION

Guru Nanak Dev University (GNDU)

Bachelor of Computer Applications (BCA) — 2024
